## Academy Archive — Manuscript Heritage Treasury of the World Science<sup>1</sup>

The first scientific archive in Russia — St. Petersburg Branch of the Archive of the Russian Academy of Sciences, the largest and most important documentation centre of the Imperial — all-Union — Russian Academy of Sciences, is universally acknowledged to be one of the treasuries of the historical manuscript materials of the fundamental world science. Unique manuscript fonds and collections of the Archive, which is going to celebrate its 300<sup>th</sup> anniversary soon, are not only of national but world importance<sup>2</sup>.

*Holdings.* As of January 1, 2016, St. Petersburg Branch of the Archive of the Russian Academy of Sciences retains 775 fonds and 488 055 folders, chronological framework of the main documentation covers the period from the 18<sup>th</sup> century to 2016 (part of the materials being of the 15<sup>th</sup>–17<sup>th</sup> centuries). The holdings of the Archive include:

- institutional fonds — 203 fonds (152 873 folders) for the period from the beginning of the 18<sup>th</sup> century to 2013;
- personal fonds — 572 fonds (241 248 folders) for the period of the 16<sup>th</sup> century to 2016;
- archival collections — 16 collections (93 934 folders) for the period of 1554–2010.

The Archive retains documents of the Administration of the Academy of Sciences (up to 1932) — the Conference (General Assembly of the Academy of Sciences, 1724–1932), all its divisions, the Chancellery and Commissions (1725–1803), the Chancellery and the Administration of Affairs of the Conference (1804–1928),

chancelleries of the Academy President and Vice-President (1818–1886), the Secretariat (1927–1939), the Secretariat and Chancellery of the Presidium (1939–1949), Committee of the Board — Administration Board — Administration of Affairs — Administrative-economic Management (1803–1948), the Secret Division (*Sekretnaia chast'*) (1922–1938). Among the documents there are original minutes of the meetings of the General Assembly and divisions of the Academy of Sciences, supplements to the minutes (*protokol'nye bumagi*), academic correspondence, scientific and administrative documents. The Archive also holds the documentation of the Russian Academy of Sciences (1783–1841).

Documentation materials of the scientific and auxiliary institutions of the Academy of Sciences of the 18<sup>th</sup>–20<sup>th</sup> centuries include the fonds of the Library, the Archive, the Publishing House, the Printing House, the Book Store, the Botanical Gardens, the Main Astronomical Observatory in Pulkovo, and others. There is a wide range of documents of different departments and chambers (drawing, engraving, instrumental, among others) dating back to the 18<sup>th</sup> century as part of the St. Petersburg Academy of Sciences, as well as the materials of the Academy research expeditions of the 18<sup>th</sup>–20<sup>th</sup> centuries not only throughout the territory of Russia but covering many other parts of the world. The archive also retains fonds of museums, beginning with the *Kunstkammer* and its specialized scientific repositories established in the early 19<sup>th</sup> century — the Museums of Anthropology and Ethnography, Geology, Zoology, Mineralogy, and others. Up to the middle of the 18<sup>th</sup> century the Academy of Sciences performed the functions of the Academy of Arts, therefore the Academic Archive holds the materials on the history of Russian fine arts and architecture, documents on the history of St. Petersburg and its suburban palaces, for example one of the first plans of the city made by French architect J. B. A. Le Blond (1717).

The evolution of science from the end of the 19<sup>th</sup> century through the first third of the 20<sup>th</sup> century is represented by fonds of different committees, associations and commissions (the Archeographic Commission, the Byzantine Commission, the Commission for the Study of the Natural Productive Forces (1915–1930), the Commission for the Study of Tribal Structure of the Population of the USSR (1917–1930), etc.) based on the laboratories and institutes of St. Petersburg — Petrograd — Leningrad: Institutes of Astronomy, Physics and Technics, Geomorphology, Chemistry, Demography, Petrography, and others, as well as the Institutes of Russian Literature (Pushkin House) and Oriental Studies (Asiatic Museum), and other institutes in the sphere of humanities.

The Archive retains materials of non-Academy research institutions and societies, including the Russian Institute of Archaeology in Constantinople (1890–1928), the Russian Chemical Society (1868–1955), the Imperial Mineralogical Society (1817–1938), the Russian Entomological Society (1846–1939), the editorial office of «Russkii Istoricheskii Zhurnal» («Russian Historical Journal») (1916–1922) and others. The archive also holds fonds of the Leningrad Branch of the Communist Academy under the Central Executive Committee of the USSR (1929–1936) and its Institutes of Agriculture, Economics, Agricultural Economics, Natural Science, Soviet Construction, State and Law, Philosophy, Marxism Methodology, History, Literature, Linguistics, as well as Marxist research societies (of biologists, physicians, mathematicians, economists, orientalists, local lore specialists and others). There are also documents of the research institutes under the Communist University in Petrograd (1922–1926) and the Leningrad Branch of the Institute of History of the Russian Association of Research Institutes of Social Sciences (RANION) (1927–1928), among others.

Documents of personal origin is mainly represented by personal papers of scientists of the 18<sup>th</sup>–20<sup>th</sup> centuries. Among the earliest materials are manuscripts of German astronomer and

mathematician J. M. Regiomontanus (1436–1476) and the so-called Pulkovo Collection (*Pulkovskoe sobranie*) — archive of one of the founders of modern natural science, German astronomer and mathematician Johannes Kepler (1571–1630), together with the manuscripts of Danish astronomer Tycho de Brahe (1546–1601).

The archive also retains personal papers of prominent Russian and foreign scientists and scholars who were members of the Academy of Sciences or associated with it. Physics, mathematics and natural sciences are represented by the documentary collections of Russian encyclopaedist scientist M. V. Lomonosov; inventor and mechanic I. P. Kulibin; mathematicians L. Euler and V. A. Steklov; astronomers V. Ia. and O. V. Struve, F. A. Bredikhin; physicists P. N. Lebedev and A. F. Ioffe; geologists F. N. Chernyshev and A. P. Karpinskii; botanists A. S. Famintsyn, K. A. Meyer, N. I. Vavilov; zoologists K. E. Baer (K. M. Ber), J. F. (F. F.) Brandt, M. A. Menzbier (Menzbir); soil scientist V. V. Dokuchaev; geographers P. P. Semenov-Tian-Shanskii and L. S. Berg; physiologists I. P. Pavlov and A. A. Ukhtomskii; chemists A. M. Butlerov, A. E. Chichibabin, V. E. Tishchenko; seafarers A. J. Krusenstern (I. F. Kruzenshtern) and F. B. Lütke (F. P. Litke), among many others.

Humanities are represented by the names of historians G. S. Bayer (T.-Z. Baier), G. F. Müller (F. I. Miller), K. A. Uspenskii (Porfirii, Bishop of Chigirin), A. A. Kunik, M. M. Kovalevskii, A. S. Lappo-Danilevskii, N. P. Likhachev, V. N. Beneshevich; art historians N. P. Kondakov and D. V. Ainalov; orientalists B. A. Dorn, W. Barthold (V. V. Bartol'd), S. F. Ol'denburg, N. Ia. Marr, I. Iu. Krachkovskii; linguists A. J. Sjögren (A. M. Shegren), F. F. Fortunatov, L. V. Shcherba; statistician and archaeologist P. Köppen (P. I. Keppen); ethnographers N. N. Miklukho-Maklai, V. G. Bogoraz-Tan, L. Ia. Shternberg; specialists in the study of literature Ia. K. Grot, N. K. Nikol'skii, and many others.

Archival collections (*razriady*) include manuscripts of research works, materials on biographies and scientific-administrative

activities, correspondence of the Academy of Sciences' members; charter and staff regulations and other documents on the history of the Academy of Sciences; archives of a number of scientific societies and collections personal documents; a collection of editions of the Academy of Sciences published by the Academy Printing House «Sankt-Petersburgskie Vedomosti» (1727–1799), printed and manuscript newspapers; a collection of portraits of scientists, metal engraving plates and prints of the 18<sup>th</sup>–19<sup>th</sup> centuries; photographic and phonographic documents on the history of science.

Among the graphic documents including maps, plans, drawings, etc. there is a collection of watercolors on paper and parchment by Swiss artist Maria Sibylla Merian (1647–1717), previously held in the Kunstkammer, along with other unique drawings of the first Russian museum's exhibits.

*Information and Reference System.* In recent years, the Archive has been updating its finding aids and reference system (see SPbB ARAS website <http://ranar.spb.ru/>). Inventories of the fonds are being scanned and displayed on the Internet. Scanned materials are accessible to researchers on the webportal «Information system „Archives of RAS”» (ISARAN) at <http://www.isaran.ru/?q=ru/funds&ida=2> and the page *Finding aids and reference system* of the SPbB ARAS website (<http://ranar.spb.ru/rus/Baza/>). At the same time, the Archive is updating the electronic database of SPbB ARAS (<http://db.ranar.spb.ru>) which mainly includes documents on the personal staff of the institutions of the Academy of Sciences, the online edition «Lomonosov and Lomonosoviana in the St. Petersburg Branch of the Archive of the Russian Academy of Sciences» (<http://db.ranar.spb.ru/lomonosov>), inventory of the drawings of objects previously held in the Kunstkammer (18<sup>th</sup> century) (<http://ranar.spb.ru/rus/page/618/>) etc.

We believe that this guide, being a general but concise description of the Academy Archive's holdings, will be helpful to researchers. It reveals rich documentary holdings

of the St. Petersburg Academy Archive detailing its fonds and inventories and including information of all fonds and collections as of January 1, 2016.

Numbers of fonds and collections are arranged in the order of increasing. Institutional fonds' articles contain the number and the name of the fond in accordance with the state registration data of the documents of the Archival Fond of the Russian Federation, along with the information concerning the name changes and the period of existence of the institution or organization. Personal fonds' articles contain the fond number, surname, name, patronymic and life dates (New Style) of the fond creator (*fondoobrazovatel'*), the information about the specialization and the area of scientific interests, as well as academic and scientific title and scientific degree.

All articles contain chronological framework of the materials (inclusive years) as well as the number and the name of each inventory and the number of folders according to each inventory.

Fonds which haven't passed scientific-technical processing (description) of the documents and/or haven't been transferred for state storage, and therefore, are not accessible in the Reading Room of the Archive, are marked as *scientific-technical processing*.

The edition is provided with the index of personal names (Name Index) of the fonds and collections of the St. Petersburg Branch of the Archive of the Russian Academy of Sciences.

I. V. Tunkina

### Notes

<sup>1</sup> The edition was prepared and published with the financial support of the Russian Science Foundation, project № 14-18-00010.

## Translator's Notes

Translation of the Register of Inventories was a project inspired by our willingness to give non-Russian speaking people a more direct access to learning about the holdings of the St. Petersburg Branch of the Archive of the Russian Academy of Sciences.

The English version of the Register corresponds in its entirety to the structure and the contents of the original Register in Russian. The Register consists of two major parts that are: the Register of Manuscript Groups and the Register of Collections.

The basic Russian archival terms (having a variety of equivalent terms in English) are translated as following:

*fond* — manuscript group

*razriad* — collection

*opis'* — inventory

*delo* — folder (other terms used: file, unit)

We have to note that particular attention was paid to transliteration of the names. The USA Library of Congress Russian Transliteration System was used.

Since the original Russian Register lists the state documents of the Archival Fond of the Russian Federation, in the English version of the Register names had to be transliterated in accordance with the Russian pronunciation and spelling tradition. Moreover, a number of foreigners having worked in Russia for long periods of time, got russified and received

Russian first names and patronymics. Thus, throughout the Register, each non-Russian name is transliterated first, and then followed by the same name in the original and traditional spelling which is given in brackets, e. g.:

*Eiler Leonard (Euler Leonhard)*

*Fisher fon Val'dgeim Grigorii Ivanovich (Fischer von Waldheim Gotthelf Johann)*

*Diubua-de-Monpere Frederik (Dubois de Montpereux Frederic)*

The Name Index, however, uses the reverse principle: the original name is given in the first place followed by the same name transliterated:

*Euler Leonhard (Eiler Leonard)*

Numerous names of institutions and organizations were translated but not transliterated. Due to abundance of Russian realia, there was an occasional necessity in literal translation.

We hope that the English version of the Register will be helpful to the wide range of researchers interested in the holdings of the St. Petersburg Branch of the Archive of the Russian Academy of Sciences.
